A persons character is very much moulded by what they talk about for better or for worse. How wonderful it is therefore to see children even at a tender age already making reference to גוף and נשמה and articulating their awareness of certain מדות רעות and their efforts to control them.

All this and much more is bound to enhance the פנים of the next generation and is to the great credit of Mrs Chrysler תחיל' who has successfully developed and implemented the נועם זיו programme. מחנכים at the Yesodey Hatorah School where the programme was piloted have marvelled at what is going on and have noted the connection between this programme and the teachings of the great חכמי המוסר והעבודה.

Wishing all involved much success
